Re: Internal Self-Audit Initiated 06/18/10
Locations Exceeding Stated Monthly Throughput Levels

Rocket Oil Company began developing a self-audit program to review all our gasoline dispensing facilities on June 18th of this year. During this self-audit, we discovered multiple instances where Operating Permits needed to be brought into line with current and potential volumes at the locations. We have completed a review of all permits and are reporting these sites in this letter. *All locations on the attached sheets have submitted applications for operating level increases.*

Due to the processing time required by the Division to process a Construction Application and our subsequent request for new operating reports, we will require an estimated 60-90 days to have the correctly permitted levels in place.

If additional information should be required, please contact Annette Sellers at the above address or at 865/938-2042.

Respectfully,

Kenneth E. McMullen
Vice President
